Description about enterprise:

Solé Pharma® Healthcare is a dynamic Latvian pharmaceutical company that produces high quality pharmaceutical products in close collaboration with doctors, pharmacists and scientific institutes, guaranteeing excellent quality and individual approach to each customer, distributor and partner. Thanks to a professional team and modern manufacturing site, Solé Pharma® Healthcare's portfolio includes over 50 different formulas, including worldwide recognizable brands. Solé Pharma® products contain amino acids, herbal extracts, vitamins and micro elements that have proven to be effective in clinical trials and daily practice. Thanks to the scientific department, Solé Pharma® Healthcare develops new formulas every year, taking into account the individual needs of each country. The company has gained international reputation for continuous development and effective cooperation, which has been established in Europe, Middle East and Asia. The company focuses on the development and production of high-quality original products based on the latest technology in science. Solé Pharma®'s mission is to improve the quality of life by offering high quality original pharmaceutical products. Solé Pharma®'s vision is to become one of the three leading pharmaceutical manufacturers in Europe.

Products

Olefar® DUO Oil Spray

Olefar® DUO Oil Spray is a fast and efficient treatment for sore throat which reduces inflammation, swelling and pain. With the unique mechanism Olefar® DUO Oil Spray is sprayed directly on the surface of the damaged mucosa, thus it perfectly covers the mucosa and its micro ulcers. Specially designed combination of natural oils is effective at any stage of inflammation.

Artroveron® 5in1 COMPLEX WITH OMEGA-3

vital components that are necessary for joint function maintenance - improves joint mobility and flexibility, restores synovial membrane, reduces inflammation processes, activates the joint regeneration and has the ability to retain fluid in the cartilage tissue, which provides good cushioning effect.
